## Cordyceps Sinensis DX

### Product Overview

Cordyceps sinensis is a rare mushroom that has been used by the Chinese dynasties since ancient times for restoring energy, promoting longevity and improving the quality of life.

Today, cordyceps sinensis has gained worldwide attention – especially after a group of Chinese runners, who were using Tibetan cordyceps sinensis, broke nine world records at the World Outdoor Track and Field Championship in 1993!

The rare cordyceps sinensis mushroom is small – usually less than an inch high – and the annual harvest worldwide is less than 660 lbs. There are more than 400 kinds of cordyceps sinensis – but none compare to the cordyceps sinensis found in Tibet. The Tibetan Plateau, which is approximately 15,000 feet above sea level, is home to some of the purest and highest-quality plants and herbs in the world. Few plants survive in this environment – with high winds and snow, intense sunlight, extreme temperature fluctuations and low oxygen levels – but the plants that do survive, are extremely potent.

Noevir uses only the highest-quality Tibetan cordyceps sinensis mushrooms, harvested in May and June, before the snow is completely melted. And with the help of Noevir's triple-extraction technology, the final product is pure, potent and provides maximum efficacy.

## Key Features & Benefits

- **Newly formulated to boost absorption and effectiveness:** An enzymatic treatment extraction is used to increase the potency while improving absorption of highly-concentrated nutrients.
- **New Ultra-fine powder processing:** The soft and ultra-fine powder provides a pleasant mouth feel and easier digestion for optimum results.
- **Contains only the highest quality of natural Tibetan Cordyceps sinensis:** There are about 400 kinds of Cordyceps discovered worldwide; however, wild grown Tibetan Cordyceps are the rarest of them all. Gathered from the Tibetan Plateau, where few plants are able to survive due to harsh weather and low oxygen levels. Helps rejuvenate the body and promote energy. Continuously growing global demand, combined with issues such as political and regional challenges, lead to even more scarcity and difficulties in obtaining the raw supply.
- **Triple-extraction technology:** Increases the purity and effectiveness of the final product.
- **Newly formulated with more mushroom extracts:** Each stick now contains 213 mg of Tibetan Cordyceps sinensis extracts, carefully selected for the highest quality. No need to brew. Dissolves easily in water and the effective ingredients are easily delivered to your body.

## Usage Guide

Conveniently packaged in 30 single-serve doses. Recommended daily dose is one stick. Dissolve in a cup of hot water (or a glass of cold water) for a highly bio-available power drink.

*(Can also be taken in its powder form with a sip of water, or it may be used in place of mushroom stock when cooking).*
