noevir daily massage steps

Noevir has developed a quick and easy daily facial massage, specially designed for today's fast-paced lifestyles. Nightly massaging (minimum 3 minutes) helps stimulate and nourish the skin for a firmer, more youthful appearance.

Step 1: Forehead

Apply massage cream to your face. Massage your forehead upward. Do this three times, making seven circles each time.

Step 2a: Eyes

Draw gentle circles around eyes. Do this five times.

Step 2b: Eyes/Temples

Now, press the inner corners of your eyes, draw one stroke outward, then press your temples.

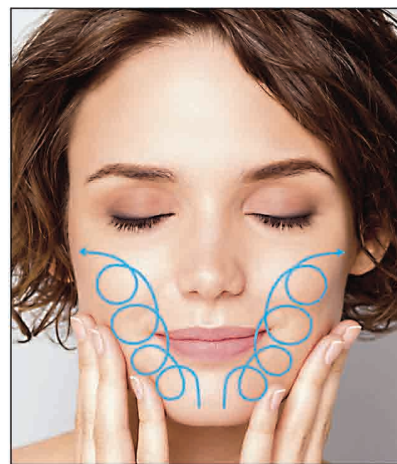

Step 3: Nose

Make a sweeping motion down the top of your nose ten times, then five times up and down the sides of your nose. Finally, draw semicircles around your nose five times.

Step 4: Mouth

Draw semicircles around your mouth five times, applying gentle pressure on upward strokes.

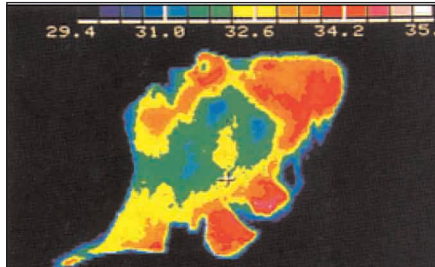

Step 5: Chin/Cheeks

Draw circles upward from your chin toward your temples using the entire hand, then press in at the temples. Do this three times, making seven circles each time.

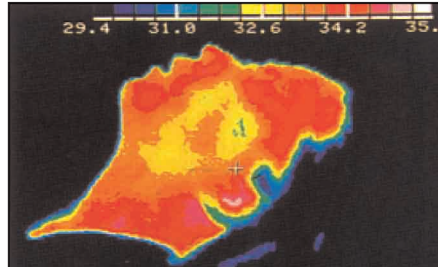

importance of massaging

Daily massaging helps boost skin turnover for a firmer, more youthful appearance.

Before massaging

After massaging

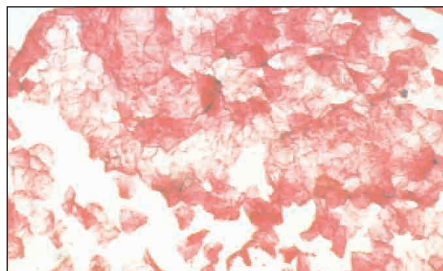

Blue areas indicate lower temperatures while red areas indicate higher temperatures on the surface of facial skin. Regular massaging is an effective way to help maintain skin resilience and elasticity. It also promotes a healthy-looking, radiant complexion.

importance of masking

The masking step is essential for drawing out embedded impurities and exfoliating dead skin cells. It also helps encourage skin metabolism and increase moisture retention.

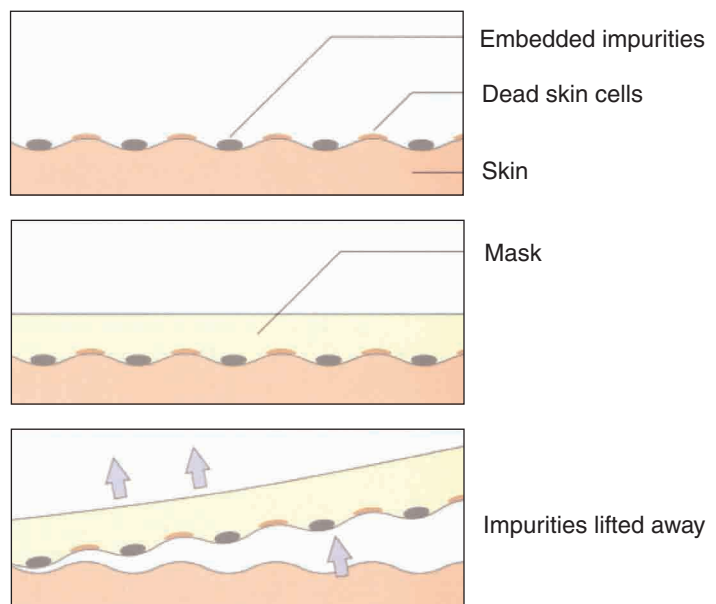

Without regular masking

With regular masking

The red dye shows the presence of dead skin cells and embedded impurities removed with a peel-off mask. Regular masking deep cleanses pores and exfoliates dead skin cells to leave behind a smooth, translucent complexion.
